

Consider OpusWorks if  
your organization wants:

- Inspired/Competent Problem Solvers
- Ignited Projects that increase ROI
- Less Deployment process waste
- Personalized learning and doing

## Some OpusWorks powered initiatives:

- Cargill's Continuous Improvement for Everyone ("CI4E") with its 160,000 employees.

- Caterpillar's delivery of all-virtual blended learning classes to its global dealer network.

- Cintas' delivery of consistent, timely, and relevant lean six sigma content to all partners.

- Kaman's use of a standard project execution approach that meets strategic goals.

- REV Group's efforts to standardize Lean execution across its many businesses.

- US Air Force's mission that every one of its 700,000 airmen is an effective problem solver.

## How OpusWorks can power your initiative:

**Inspirational Learning:** Competency Learning (nodes, exercises, activities) can build discrete problem-solving skills using over 50 Basic, Intermediate, and Advanced Competencies

**Blended Learning:** (modules, materials, class designs) can develop all practitioner levels (WB-MBB) featuring content from 100+ multi-lingual e-Modules

**Project Tracking:** Smart tools that assure alignment with strategic goals, compel use of best practice methods, and identify intervention needs, can help increase project ROI.

**Deployment Expansion:** By automating processes like data gathering, test grading, materials assembly, surveys, and communications, deployments can scale more rapidly.

**"Ask Opus" AI:** Answers to questions, relevant examples, trusted mentoring, and non-judgmental help are a few ways "Ask Opus" can personalize learning and project execution.
